Response to Arguments

1. Applicant's arguments with respect to claims 2-4, 9-11 and 16-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 2-4, 9-11 and 16-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Regarding independent claims 19 and 24, Applicant is claiming a description of the interconnection/connectivity between nodes, ports and segments as associated with a topological map, but Applicant fails to indicate an operation or function that is being implemented through the detailed description of the topological connectivity. In other words, Applicant is just providing descriptive material that is non-functional, and storing it on a computer program storage medium. Claim 2-4, 9-11, 16-18 and 20-26 depend on claims 19 and 24, therefore, claims 2-4, 9-11, 16-18 and 20-26 are rejected for the same reason that claims 19 and 24 are rejected.

Claim 27 is rejected under 35 U.S.C. 101 because Applicant is claiming a topological map, which is non-functional printed matter, whereby Applicant is claiming a

mapping description of the connectivity/interconnection between nodes and associated ports and segments, that performs no function or operation.

Applicant can refer to Patentable Subject located in chapter 2106, section IV in the MPEP.
